

The **British Society of Toxicological Pathology (BSTP)** was founded in 1985 as an organisation primarily for pathologists working in the field of toxicological pathology, with the aim of advancing all aspects of toxicologic and experimental pathology for pathologists, toxicologists and bioscientists through training programmes and continuing educational symposia so as to enable professional development, competence and guidance for new trainees and experienced members alike.

For nearly 32 years, the British Society of Toxicological Pathology (BSTP) have been committed to providing high quality educational opportunities for its members and other scientists working in the field of toxicological and experimental pathology.

The main focus of the BSTP is the organisation of Continuing Education Symposiums (CES) which offer high quality CPD opportunities for toxicological and discovery pathologists (and other scientists working with animal models), clinical pathologists and toxicologists as well as non-clinical regulatory scientists.

The BSTP also hold an Annual Scientific Meeting, which in recent years has been a collaborative event with other societies. In addition to providing CPD opportunities, these meetings provide a unique opportunity for interaction and networking between scientists from a wide range of disciplines.

The BSTP are a non-profit-making organisation and a Registered Charity - Number: 1043793.
